Receipt is acknowledged of the preliminary amendment filed June 9, 2008, which has been entered in the file.

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 to 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Egli (WO 2004/035690), cited.

Determination of the scope and content of the prior art (MPEP §2141.01)

The reference discloses a structurally similar azo disperse dye that is useful for the dyeing and printing of hydrophobic materials. Note page 6, lines 13 to 32. The dye of the reference is structurally similar to the claimed disperse dyes of the formula (I) wherein D is the radical (K₁) wherein R₁ is acylamino and R₂ is hydrogen; R³ is ethyl; Y is C₂ alkylene; R⁴ is hydrogen; and R⁵ is phenyl. Note Example 29 on page 21. The reference also discloses a similar process for the preparation of the dye. Note page 4, line 22 to page 5, line 6.

Art Unit: 1626

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The dye of the reference differs from that claimed in that it is a homolog. For example, the group that corresponds to R³ is ethyl instead of methyl or the group that corresponds to Y is ethylene instead of propylene.

Finding of prima facie obviousness---rational and motivation (MPEP §2142-2413)

It has been held that homologs are obvious over one another. See *In re Wood*, 199 USPQ 137, for example. One of ordinary skill in the art would have been motivated to make the claimed dyes with the expectation that additional dyes useful for dyeing and printing hydrophobic materials would be obtained. The claimed dyes would have been rendered obvious by the homolog of the reference in the absence of any unobvious property. The claimed method of dyeing and printing, process for preparing the dye, dye composition and fibrous material would also have been rendered obvious in the absence of any unobvious property or result.

No claim is allowed.
